Subject: FW: Exceptional Event Guidance: Stratospheric Ozone Intrusion
Attachments: Draft EPA EE SOI Guidance_20180807.pdf

FYI, if you want to comment.

Greetings:

As part of our effort to continue improving implementation of the Clean Air Act's exceptional event provisions, the EPA is developing Guidance on the Preparation of Exceptional Events Demonstrations for Stratospheric Ozone Intrusions to reflect the 2016 revisions to the Exceptional Events Rule. The guidance is intended to facilitate Exceptional Events Rule implementation by providing example language and sample analyses that air agencies may use in demonstrations for stratospheric ozone intrusions.

As we near completion of this guidance, we are pleased to invite air agency review and consideration of the attached draft document. We encourage air agencies to focus their review on (1) Corrections or clarifications of content, and (2) Suggestions for additional information that would be helpful to include.

Please kindly email your comments or suggestions on the attached draft guidance document to Ben Gibson at gibson.benjamin@epa.gov by October 15, 2018.

We welcome and sincerely appreciate your input!

Thank you,

Anna Marie Wood
